

Something you may want to check into.

In the past the Celina Police Department received a complaint of noise at the swimming pool after closing hours. It was found the Service Director was there with his family using the pool after hours. The responding Officer made a report. A time later the report was no

where to be found. Supposedly the officer contacted an outside agency to investigate about the report an official record disappearing.

Later it was determined that there was no need for a first shift Sergeant. So the first shift Sergeant is now working second shift and the Sergeant who had been working second shift is working a split shift consisting of a combination of second so many days and third shift

so many days. I believe when you investigate that you will find the Sergeant that is now working the split shift of second and third is the officer who complained about the report disappearing.

One Sergeant has been recently been suspended and currently another one has a Pre Disciplinary hearing scheduled. Which is the step before a suspension of termination. You will also find that the Sergeant that has already served his suspension is again the same one

who complained about the missing report.

Could this all just be coincidence or is this all connected ?

Det Ron Waltmire is also retiring from the Celina Police Dept and rumor has it that he will be hired part time by the Mercer County Prosecutors Office as an Investigator.

Thought maybe you could check into this and see what is going on. Please don't throw me under the bus for giving you these tips. You see there is only a limited amount of people that know this.
